Summary Including concerns/issues/discussions:

1) **Approve A+-** Schools who receive an A or raises their schools performance by one letter grade are awarded money based on number of students in attendance. The school can receive up to \$100 per student, depending on how state is awarding districts. Charlotte High received an A this year. A committee was formed to discuss how to split up A+ money.

The committee agreed that 10% would be taken off the top of the total amount awarded for instructional use and the remainder of the money would be split equally among teachers, custodians, food service, and paraprofessionals. Employees who worked the 2011-12 school year would be included in this.
